ANNUAL REGENT STUDENT FINANCIAL AID STUDY

Action Requested: Receive the annual Regent student financial aid study for 2012-2013.

Executive Summary: In response to the Board’s request for information regarding the socio-economic status of students who receive financial aid at the Regent universities, the Board Office and university financial aid representatives designed and implemented the annual Regent Financial Aid Study in 2004. This study analyzes student financial aid by adjusted family income (AGI) of a segment of the population of financial aid recipients at the Regent universities and looks at characteristics of students receiving financial aid.

The results of the Regent Student Financial Aid Study conducted in Fall 2013 revealed that, in 2012-2013, there were 23,870 full-time, resident, dependent undergraduate FAFSA filers who received and accepted financial aid at one of the Regent universities. This is a decrease of 86 students (-0.4%) from the prior year.

At the three Regent universities, a financial aid package is designed for each undergraduate student who applies and completes a FAFSA. The financial aid package, which includes a combination of grants/scholarships, work-study/employment, and loans, is designed to meet each student’s total financial need. However, frequently, students, especially those with a family AGI < $15,000, do not accept certain components of the package, such as employment or loans. This results in what appears to be unmet financial need for the student.

Financial need is calculated by subtracting the expected family contribution from the cost of attendance (tuition, fees, books, room and board, and personal expenses).

Unmet financial need results when the financial aid (grants/scholarships, loans, and work-study/employment) provided by the institution or other sources and accepted by the student is less than the total need.

Overmet financial need results when the financial aid accepted by the student primarily through non-need based programs exceeds total need. These dollars may be used to help defray the expected family contribution.

Changes/Trends

Students with a family AGI < $15,000 tend to have a higher average total grant award and a smaller total loan award accepted while students with a family AGI ≥ $45,000 tend to have a smaller grant award and a higher total loan award accepted.

There was a decrease in the number of full-time, resident, dependent undergraduate FAFSA filers. This is the second consecutive year of a decrease.

Using the AGI criterion, the number of students whose average financial aid accepted exceeded the calculated need decreased by 623 (-3.8%) from 16,435 to 15,812. This is the second consecutive year of a decrease.

1 FAFSA – Free Application for Federal Student Aid.
2 There were approximately 36,200 full-time, resident undergraduates in Fall 2013.
3 From all sources.
In 2012, Iowa had the 12th highest college participation rate (45.9%) for 18-24 year old students from low income families; the national average was 34.0%. Since 1993, Iowa's low income college participation rate of 18-24 year olds has had an average of 37.4%, well above the national average of 26.0%.  

The following table describes the average financial need by family adjusted gross income (AGI) for all students in this study at the three universities. Students whose families had an AGI ≥ $75,000 had no unmet need. In fact, the average financial aid accepted exceeded the calculated need by $5,238 due, in large part, to receiving non-need-based loans. This group also constitutes the majority of students (57.8%).

The Regent Financial Aid Study addresses the Board of Regents Strategic Plan priorities of “access, affordability, and student success” and “educational excellence and impact”  as well as Goal 1 – “Iowa’s public universities shall be affordable to all academically qualified Iowa residents.”

**Background:**

The Regent Financial Aid Study includes the following variables:

- FAFSA filers who are undergraduates, full-time, dependent students, Iowa residents, receiving financial aid;
- family income (adjusted gross income);
- cost of attendance;
- expected family contribution;
- total need;
- total financial aid accepted; and
- financial need not met by aid accepted by students.

---

1 Postsecondary Education Opportunity, October 2013.
The Regent Financial Aid study reflects these characteristics:

- The financial aid packages offered to students do not include institutional employment (other than work-study) or off-campus employment. Institutional and off-campus employment can be used by students to meet their financial need.
- Except for programs such as ROTC and TEACH, federal grants are primarily need-based. State grants are also need-based. For institutional/private grants, there is a blend of need-based and merit-based aid.
- Loans, such as Perkins and subsidized Stafford loans, require demonstration of financial need. Other loans, such as unsubsidized Stafford loans, PLUS, and alternative loans, do not require demonstration of need.
- There has been a reduction in the availability of private educational loans since 2009-2010.

1 Includes PLUS.
2 Primarily institutional/private grants.
At the University of Iowa, there were 6,587 students in this study who received and accepted financial aid in 2012-2013. This is a decrease of 156 students (-2.3%) from the prior year and the second consecutive year of a decrease.

At Iowa State University, there were 11,288 students in this study who received and accepted financial aid in 2012-2013. This is an increase of 394 students (+3.6%) from the prior year.

At the University of Northern Iowa, there were 5,995 students in this study who received and accepted financial aid in 2012-2013. This is a decrease of 324 students (-5.1%) from the prior year and the second consecutive year of a decrease.

Using family income as the criterion, there were 23,870 students who received any type of financial aid in 2012-2013. Approximately 11% had a family AGI < $30,000; ≈20% had a family AGI of $30,000-$59,999; ≈24% had a family AGI of $60,000-$89,999; and ≈46% had a family AGI ≥$90,000.

In 2012-2013, there were 17,837 students who received some type of grant award; this represents an increase of 452 students (+2.6%) from the prior year.

- For students with a family AGI <$30,000, the average grant award was $8,659 compared to $8,618 (+0.5%) the prior year.
- For students with a family AGI of $30,000-$59,999, the average grant award was $6,452 compared to $6,384 (+1.1%) the prior year.
- For students with a family AGI of $60,000-$89,999, the average grant award was $4,246 compared to $4,418 (-3.9%) the prior year.
- For students with a family AGI ≥$90,000, the average grant award was $3,808 compared to $3,667 (+3.8%) the prior year.

In 2012-2013, there were 19,341 students who received some type of loan\(^1\); this represents a decrease of 780 (-3.9%) from the prior year.

- For students with a family AGI <$30,000, the average loan award was $7,141 compared to $7,002 (+2.0%) the prior year.
- For students with a family AGI of $30,000-$59,999, the average loan award was $7,948 compared to $8,170 (-2.7%) the prior year.
- For students with a family AGI of $60,000-$89,999, the average loan award was $9,277 compared to $9,477 (-2.1%) the prior year.
- For students with a family AGI ≥$90,000, the average loan award was $9,848 compared to $9,987 (-1.4%) the prior year.

All students included in the financial aid study received some type of financial aid. However, the largest proportion of the students (=81%) received a loan; ≈67% received an institutional or private grant; ≈33% received a federal grant; ≈10% received work-study funds; and ≈3 received a state grant.
