(1) This includes three types of students - those confined to wheelchairs; those using other assistive devices such as crutches and braces; and those not using assistive devices but whose movement from place to place is significantly impeded. Temporary mobility impairments (for examples, sprained ankle) should not be considered in determining mobility impaired enrollments.

(2) This includes all persons who, even with corrective lenses, have vision which is sufficiently poor to require assistance (such as use of readers or enlargers) to function as students.

(3) This includes all persons who are totally deaf or who, even with corrective devices, are sufficiently hard of hearing to require assistance in order to function in educational programs.
