**IOWA STATE UNIVERSITY FLOOD/STORM RECOVERY**

**Action Requested:** Receive the oral report on University flood recovery activities to date.

**Executive Summary:** During the week of August 8, 2010, substantial rain fell in the Ames area. Beginning on the evening of August 10, 2010, and continuing into August 11, 2010, Squaw Creek, which travels through the campus, and the Skunk River to the east created significant flooding to a number of Iowa State University facilities. The floodwaters directly affected 17 structures/sites on the campus; an additional 42 structures received water damage from backed up storm sewers and high surface water flows on campus areas far removed from Squaw Creek.

Attached is a spreadsheet, prepared by the University, which details expenses and anticipated funding for the damage from the 2010 storms and flooding, which occurred from June 1, 2010 – August 31, 2010.

Iowa State University Vice President for Business and Finance Warren Madden will provide at the August 2011 Board meeting an oral report on University flood activities to date.

Iowa State University  
Flood Recovery Expenses and Anticipated Funding
