▶ ISD and IBSSS invest in ISU's Long-Term Endowment.					

Background:

Board of Regents investment policy: <http://www.regents.iowa.gov/Policies/Chapter%207/chapter7.04.htm>

The Board of Regents employs an investment advisor for periodic review and evaluation of investment policy, strategy, and performance. Wilshire Consulting has been the investment advisor to the Board and Regent institutions since May 1996. Wilshire assists with the evaluation of the Board's investment policies and provides quarterly portfolio summary reports on fund and investment manager performance.

The Regent institutions maintain the following investment portfolios:

OPERATING PORTFOLIOS

The primary goals for investment prudence of the operating portfolios include safety of principal, maintenance of liquidity to match expected liabilities, and a reasonable return. The operating portfolio is to be managed to ensure funds are available to support operational needs.

RESTRICTED BOND ACCOUNTS

Bonds accounts include proceeds from bond issues. Accounts include project construction funds, sinking funds, and reserves. Each individual bond has specific investment restrictions which may vary by type of account with reserve accounts being the most restrictive as to types of authorized investment.

INTERMEDIATE TERM PORTFOLIOS

Intermediate term pools provide added flexibility for long-duration asset investment including quasi endowments, which are longer-term in nature but have no externally-imposed restriction that the principal remain intact.

ENDOWMENT PORTFOLIOS

The Board's investment policy defines endowment funds as primarily donor gifts and other funds received for specific purposes. The purpose of endowment funds is to provide:

- ▶ Intergenerational equity of income in perpetuity; and
- ▶ A stable income sufficient to meet the reasonable spending needs of the component endowments by keeping pace with inflation and not degrading the real value of the corpus over time.

Below are the Board authorized fund managers:

<u>MANAGER</u>	<u>TYPE</u>	<u>AUTHORIZED</u>

Section 5
Capital Market Update

U.S. Equity

The U.S. stock market was flat for the second quarter of 2015, up just 0.06%. Although news out of Europe concerning the fate of Greece dominated the headlines as the quarter ended, there is no evidence that the broad market is overly concerned as implied volatility measures remain within a normal range. The likely reason is that Greece does not pose the same threat to the global economy that it once did. Most of its debt is now held by other governments and the IMF while potential contagion economies such as Spain have improved.

Large capitalization stocks outperformed smaller shares during the quarter while growth stocks led value. Sector performance was mixed with five of the ten sectors finishing in positive territory. Health Care and Telecom Services were the leaders and Utilities were the primary laggard.

Employment conditions in the U.S. have slowly but steadily been improving since the Credit Crisis. One aspect of the overall picture that is finally showing signs of life is wages. The Employment Cost Index has strengthened after years of inflation-like increases. Should wage growth continue, it would provide the Federal Reserve additional cover if they decide to raise rates in 2015.

Non-U.S. Equity

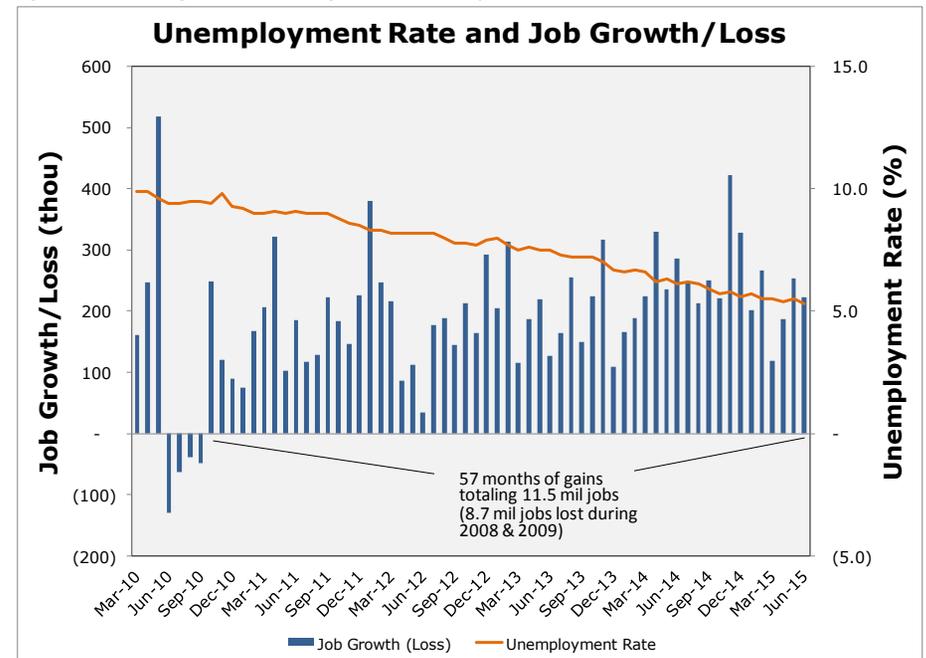

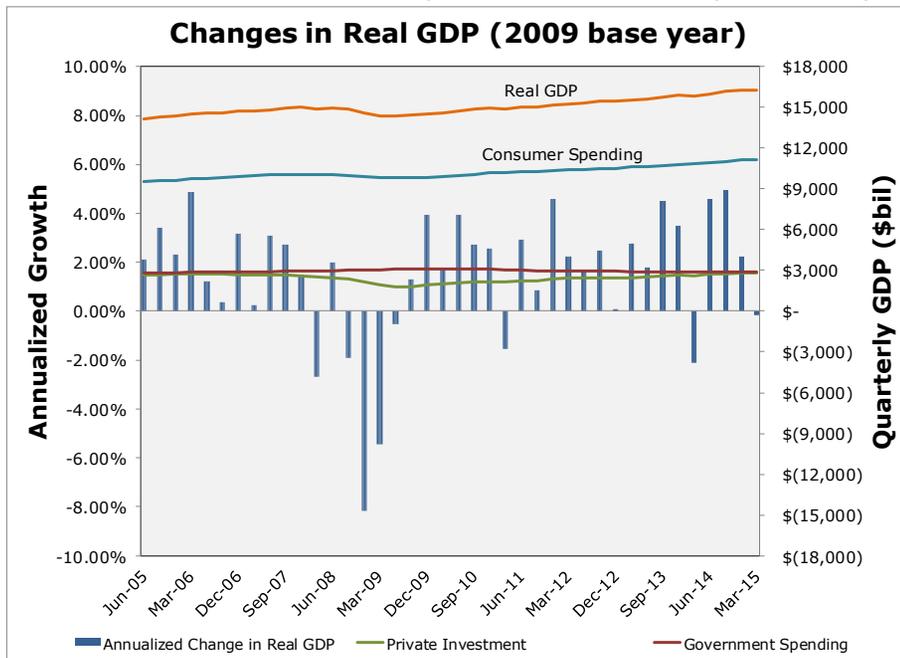

The European stock market rally that ushered in 2015 was brought to an abrupt end by the late-June breakdown in negotiations between the European Central Bank and beleaguered Greece, resulting in a second-quarter loss for European region stocks in local currency terms. Pacific region stocks also lost ground in June, but returned positive performance for the second quarter, adding to their strong first-quarter returns. The U.S. dollar fell against European currencies, however, improving performance for U.S.-based investors. China's stock market suffered a deep correction in June, but year-to-date its run-up has been stunning, underpinning gains in emerging market equities as a whole.

Fixed Income

Although the U.S. Federal Reserve refrained from raising short-term interest rates, investors still began selling bonds to lock in gains and prepare for higher rates by year-end. U.S. Treasury yields rose during the quarter at all maturities beyond one year. Short-maturity bonds trimmed their losses relative to longer-term paper, unsurprisingly. Sluggish corporate earnings growth and broad investor rotation out of bonds drove credit spreads somewhat wider during the second quarter.
