GENERAL CLASS DESCRIPTION:

Under the direction and supervision of a licensed Veterinarian, provides intermediate care for ill and injured animal patients or animals used in a research or hospital setting. May perform veterinary care, animal husbandry, and basic technical skills with fourth-year veterinary students. Provides assistance to students, Veterinarians, and investigative staff in their treatment of animals, teaching, or research functions. Position operates within standard guidelines and alternatives that are known, and any deviation from such requires prior approval. Guidance and mentorship can be provided by Veterinary Technician II or III.

CHARACTERISTIC DUTIES AND RESPONSIBILITIES:

1. Assists with basic nursing care on American Society of Anesthesiologists (ASA) physical status classification level I and II patients, which are considered healthy or with mild systemic disease. Nursing care to include but not limited to: monitoring body functions (temperature, respiration, heartbeat, amount and frequency of food consumptions, defecation, urination etc.) and noting abnormalities; placing and maintaining intravenous catheters; administering fluids and medications orally, parenterally, and enterally; and performing other basic treatments.

2. Collects and processes samples for research, diagnostic, and clinical purposes.

3. Assists with basic preparatory procedures on various animal species and assists staff members in surgical, medical, or laboratory procedure preparation, including instrument and supply set up.

4. Administers anesthesia and monitors patient response through the recovery period for ASA I-II patients.

The tasks listed under the heading of Characteristic Duties and Responsibilities are examples of the variety and general nature of duties performed by employees in positions allocated in the class. The list is descriptive only and should be used for no other purpose. It is not intended that any position include every duty listed, nor is it intended that related duties cannot be required.
5. Maintains orderly and sanitary work areas for clinical, teaching, and research facilities.

6. Stocks and organizes patient exam rooms, treatment areas, holding areas and operating rooms.

7. May assist with entering hospital costs and medical records into the computer to create accurate records for billing accounts.

8. Assists with set up, inventory, maintenance, security, and repairs for equipment and instruments used in surgical procedures, emergencies and/or lab sessions.

9. Utilizes ultrasound machines and x-rays, assist with MRI, or other related imaging equipment for patient diagnostics.

**KNOWLEDGE, SKILLS, AND ABILITIES:**

1. Knowledge of animal health and welfare - animal isolation, sample collection, medical treatment, nursing and monitoring, pre & post-surgical requirements including room and supply preparation.

2. Knowledge of pharmacology - dosage, calculations, and usage.
