Source: Western Interstate Commission for Higher Education, 2003.

The definition of a high school graduate has been determined by the state. The sum of the graduates by race/ethnicity may not equal the total public graduates due to differences in the way the historical data are reported by the state and because the graduates for each race/ethnicity were projected separately from the total public projections.

Public: No additional notes.

Nonpublic: Graduate data are not collected by the Iowa Department of Education. From 1990-91 to 1994-95, graduate data are based on the ratio of twelfth grade-to-graduate data from the National Center for Education Statistics' Private School Survey. For 1995-96 forward, the number of twelfth graders is used to estimate graduates.

Additional state-specific notes are also contained in the *Compendium of Supplementary Tables* to complement this report.
