Project Description and Total Budget	\$ 22,000	May 2001	Requested

The School reports that the existing asphalt shingle roof, which consists of approximately 10,000 square feet, is missing many shingles due to its age and recent hail and wind damage. The existing roofing materials were installed in 1981 and have reached the end of their life expectancy.

The project would remove the existing shingles and install new asphalt shingles which would have an estimated life expectancy of 25 years. The new roof would be under warranty for the same time period.
